Calculator-led marketing

Why a simple calculator brings more leads than a "Contact us" page.

Swipe →

The problem

Your visitor has one question:

"How much will it cost me?"

Most pages answer: "Contact us for a quote." So they leave.

What a calculator does

- → Visitor types their own numbers
- → Gets a real answer in 10 seconds
- → Trusts you more than the page that hid the price
- → Leaves WhatsApp for the detailed quote

Examples by business

- **CA:** old vs new tax regime
- **Loan advisor:** EMI + eligibility
- **Coaching:** fee + scholarship
- **Solar / interiors:** cost + savings
- **Clinic:** treatment cost range

Why Google likes it too

- → Answers the exact question people search
- → People stay longer and come back
- → Other sites link to useful tools
- → Works in Hindi and English

Our proof

We built **300+ calculators** on parachar.com since Aug 2026.

~3,500 Google impressions a day
Average position ~7.5
