Real-estate leads don't die in the ad. They die after the form.

4 handoffs, 3 fixes, 1 number to track →

01

Parachar

Save for your team

Where a lead actually leaks

Ad → form → call centre → branch sales → site visit.

4 handoffs. Every handoff is a delay, and every delay lets a competitor reply first.

02

Fix 1: answer in minutes, not days

Instant WhatsApp to the buyer the moment the form lands.

Floor plan + price sheet + two site-visit slots. The call can follow; the first reply can't wait.

03

Fix 2: route it, then time it

Leads go by project/area/budget to one owner, not a shared inbox.

No call in 15 minutes → automatic alert to the sales manager. Speed becomes a visible metric.

Fix 3: tell the ad platform who visited

Send site-visit and booking outcomes back as offline conversions.

Now campaigns optimise for people who visit, not people who tap "submit".

05

The number to report weekly

Cost per lead flatters. Cost per site visit tells the truth.

Track by campaign: leads → contacted in 15 min → visits booked → visits done → bookings.
